SUMMARY

AI & Data Science graduate with 1+ year of experience in Support AI Engineering, data science, and machine learning. Skilled in Python, SQL, predictive modeling, data analysis, and business intelligence tools, with hands-on experience in data preprocessing, EDA, model support, and workflow automation. Committed to delivering AI-driven and data-focused solutions that enhance business performance and operational efficiency.

EXPERIENCE

Support AI Engineer

Ethic Leaf Pvt. Ltd.

Jan 2026 - Present

- Provided technical support for AI-powered applications, ensuring smooth system functionality and timely resolution of model or software-related issues.
- Monitored machine learning model performance, identified efficiency drops, and contributed to optimization strategies using real-time performance data.
- Processed, cleaned, and validated large datasets using Python libraries such as Pandas and NumPy to maintain data quality for AI systems.
- Collaborated with cross-functional development and data teams to troubleshoot technical challenges and improve system workflows.
- Conducted exploratory data analysis (EDA) to uncover trends, anomalies, and operational insights for model enhancement.
- Automated repetitive reporting and data-processing tasks using Python, significantly reducing manual effort and improving operational efficiency.
- Supported deployment, validation, and testing of AI models in production environments.

Data Science Intern

Codetech IT Solutions Pvt. Ltd.

Jan 2025 - Dec 2025

- Cleaned, transformed, and preprocessed raw datasets using Python, Pandas, and NumPy to ensure data quality for analysis and modeling.
- Performed exploratory data analysis (EDA) and statistical analysis to identify patterns, trends, and actionable business insights.
- Built, tested, and optimized machine learning models using Scikit-learn for predictive analytics tasks.
- Created visualizations, dashboards, and performance reports using Matplotlib, Seaborn, Plotly, Power BI, and Excel.
- Worked with SQL databases such as MySQL and PostgreSQL to extract, manage, and analyze project data efficiently.
- Documented project findings, prepared reports, and presented insights to mentors or stakeholders in a clear and structured manner.
- Collaborated on real-world, project-based tasks while improving technical skills through continuous learning, feedback, and workflow optimization.

EDUCATION

AKS University, Satna Madhya Pradesh

July 2021 - May 2025

B.Tech in Computer Science Engineering (AI & Data Science)

SKILLS

Programming & Tools: Python, SQL, Pandas, NumPy, Jupyter Notebook, VS Code, Excel, The Quadratic AI Spreadsheet

Machine Learning & AI: Scikit-learn, TensorFlow, Predictive Modeling, Data Preprocessing, Hyperparameter Tuning, Model Validation, Workflow Automation

Data Analysis & Visualization: Exploratory Data Analysis (EDA), Statistical Analysis, Matplotlib, Seaborn, Plotly, Power BI, Tableau

Database Management: MySQL, PostgreSQL

Core Areas: Machine Learning, Data Science, AI Support, Data Cleaning, Data Wrangling, Predictive Analytics, Reporting, Data Scraping

Soft Skills: Problem Solving, Analytical Thinking, Critical Thinking, Communication, Collaboration, Time Management, Adaptability, Continuous Learning

PROJECTS

Movie Recommendation System (Python, NLP, Streamlit)

- Developed an NLP-based recommendation engine that suggests similar movies based on genres, keywords, and user preferences.
- Built an interactive Streamlit application for user-friendly recommendations.

Spam Email Classifier (Machine Learning & Natural Language Processing)

- Developed a spam email classification system using Machine Learning and Natural Language Processing (NLP) techniques to accurately detect and filter spam messages.
- Performed data cleaning, text preprocessing, tokenization, and feature extraction using NLP methods such as TF-IDF and Count Vectorization.

IPL Exploratory Data Analysis (Python)

- Performed comprehensive data cleaning, missing value handling, feature analysis, and statistical exploration.
- Created visual reports using Matplotlib and Seaborn to identify trends, patterns, and strategic insights.

Pizza Sales Analysis (SQL)

- Analyzed customer behavior, product demand, seasonal sales patterns, and inventory trends using SQL queries.
- Delivered insights that could support business growth and operational improvements.

CERTIFICATIONS

- Natural Language Processing Certification - Infosys
- Deep Learning Certification - Infosys
